

## ACCUTRAK POSITION MONITORS

If you are looking to optimize the performance of your plant and improve its efficiency, then consistent precise valve monitoring is not just important, it is critical. Our AccuTrak position monitors offer the optimum solution - providing an integrated and extremely cost effective method of monitoring your rotary and linear valves.

### FEATURES

- Switch stabilization plate ensures reliable operation
- Wide range of switches and sensors
- Choice of conduit entries and threads
- Range of enclosures allow multiple switches and sensors to be fitted
- Enclosures have unique serial numbers
- Wide range of certification options

### ROTARY VALVES

AccuTrak monitors are ideal for both manual and automated rotary valves. The switches/sensors, wiring terminals, enclosures and local visual indication are all combined in one compact unit, which can be mounted directly or via a valve actuator.

### LINEAR VALVES

AccuTrak monitors are suitable for linear valves through the use of an explosionproof junction housing and hermetically sealed proximity switches.

### ENCLOSURES

AccuTrak position monitors feature a full range of high quality enclosures, including stainless steel, aluminium and durable engineered resin.

### AREA CLASSIFICATIONS

Suitable for a range of area classifications, from general purpose to explosionproof applications, AccuTrak position monitors are designed to comply with most hazardous area requirements. Please ask about the certification that is available for your specific specification and configuration.
